

**ACHIEVING OVER 5% SAVINGS FOR A GLOBAL
APPAREL MANUFACTURER BY OPTIMIZING
PROCUREMENT PROCESSES**

Overview

Our client, a global leader in the apparel manufacturing sector, operates a vast network of stores and online channels across major markets. Known for its premium quality over 3,500 + stores across major markets products, the company has a significant presence in both B2C and B2B markets. To streamline operations and enhance procurement efficiency, the client sought a digital solution that could address their complex procurement needs.

CHALLENGES: PROCUREMENT INEFFICIENCIES

Limited transparency across procurement operations:

The company faced challenges with inadequate insight into its procurement workflows, leading to overlooked cost-saving opportunities and hindering key stakeholders' ability to monitor auction activities effectively.

Excessive Turnaround Time (TAT):

Extended TAT from Purchase Requisition (PR) to Delivery, resulting in delays and impacting procurement timelines.

Difficulties in supplier management:

Due to varied systems and limited visibility, of approvals, notifications or mail communication resulted impacting delivery timelines and quality.

SOLUTION: IMPLEMENTATION OF PROKRAYA

To address these challenges, the client implemented Prokraya's platform, integrating all procurement data into a centralized dashboard. Prokraya's auctions module provided the client with robust tools to automate and streamline supplier management over bids, and real-time analytics.

Centralized data:

Unified all procurement data from PR to PO, giving stakeholders a single, transparent view of procurement operations.

Automated notifications and alerts:

The system includes automated notifications and alerts to keep stakeholders informed about critical procurement activities. This feature ensures that relevant parties are updated on auction status, supplier response and previous performance, and any deviations from planned procurement activities, enhancing overall situational awareness.

Reports and real-time analytics dashboard:

Prokraya single platform one stop solution provided real-time analytics for enhanced approval check and informed decision-making.

IMPACT: OPERATIONAL EFFICIENCY AND COST OPTIMIZATION

Reduced Turnaround Time

Prokraya's solution decreased TAT from PR to PO from several days to under 24-48 hours, expediting procurement cycles and reducing delays.

Digitized Supplier Information

Prokraya enabled the client to digitize and centralize data for suppliers, fostering a streamlined supplier management experience and boosting active supplier participation for auction over approximately 21%.

Substantial Cost Savings

By optimizing procurement operations and enhancing negotiation capabilities, the client managed procurement 5% savings within six months.

- Direct savings: Directly impacted the pricing of purchasing items, leading to substantial cost reductions on key procurement activities.
- Indirect savings: Significant indirect savings through enhanced operational efficiency, reduced manual processes, and improved supplier collaboration.

ABOUT PROKRAYA

Prokraya helps streamline source-to-pay transactions and enhance collaboration across the supply chain ecosystem. Our solution help leaders reciprocate to changing customer needs, optimize inventory levels, speed time to market, and improve overall supply chain performance.
