Business Challenge

Prokraya worked in conjunction with the organization's leadership team and business stakeholders to pinpoint the following areas of concern that require attention.

- Manual processing of supply, procurement, and all spending - A traditional, hands-on approach was used in managing various aspects of the supply chain, procurement procedures, and overall expenditure within an organization.
 - Challenge to update and track suppliers' data - Faced difficulties in maintaining accurate information amidst changes, dealing with the volume of data, and ensuring regular updates.
 - Tracking all transactions data unavailable - This deficiency hampered the organization's ability to trace, analyze, and derive insights from the comprehensive details of its financial activities.
 - All invoicing managed manually - human efforts were involved in managing and processing invoices.
 - All engagement between internal and external stakeholders' manual - Human intervention was employed in managing
 - Manual work of procurement processes - The approach, reliant on human efforts, involves a significant investment of time
 - Meeting audit compliance for finance area of concern - The current process made it difficult for the organization to meet audit requirements as the data was scattered.
 - Analytical data on spend a major challenge - Effectively obtaining analytical data on expenditure posed a substantial
- Lack of interface with ERP

Solution Delivered

Prokraya implemented its Source-to-Pay automation tool, facilitating comprehensive supply, procurement, and spending automation. The success strategy comprised a three-month roadmap, incorporating data sharing, product deployment, enterprise training, and strategic execution to ensure a seamless transition and optimize the utilization of the automation tool across the organization's operations.

Customized and configured to suit requirements

Migrated old data - supplier, PO, Invoices, Receipts of 1 Million transactions enabling business continuity

The integration of the P2P (Procure-to-Pay) solution with the customer's existing Oracle ERP system enables a centralized system for all procurement activities. This integration allowed real-time data interfacing, which provides suppliers and employees with a digital experience, leading to more efficient procurement processes

Executed 25+ Complex Workflow Customizations to meet customer's requirements that increased efficiency and productivity

New system scalable to support 1000+ Active Users, to accommodate more users

Impact Created

Automation enabled 88% increase in greater collaboration between suppliers and employees enhancing, and enriching digital experience. Seamless flow of data between Oracle and Prokraya.

There was a significant 85% increase in visibility for spend analysis and management. This improvement indicates an enhanced ability to monitor and understand expenditure patterns, contributing to more informed and strategic financial decision-making within the organization.

A notable enhancement of 79% in operational efficiency was observed among all stakeholders. This improvement signifies a substantial boost in effectiveness and productivity across various individuals or groups involved in the process.

Audit compliance eliminated errors, and increased agility. Adhering to audit standards ensured accuracy and contributed to improved adaptability and responsiveness within the operational framework.

Implemented 30+ custom Reports and Analytics to make informed decisions provided a diverse range of insightful information, empowering users to make well-informed decisions. This customization ensured a robust reporting system, facilitating data-driven decision-making across various aspects of the implemented solution.

The automation of the E-sourcing/contracts module resulted in a remarkable 91% reduction in the manual procurement process. The implementation of automated functionalities enhanced efficiency & minimized manual intervention.

Conclusion

Prokraya played a pivotal role in resolving the organization's challenges, introducing heightened transparency, visibility, and operational efficiency. This transformation resulted in improved decision-making and compliance adherence. The implementation of workflow automation strategically allocated employee time, redirecting their focus towards more strategic tasks. Consequently, overall efficiency increased.
